Title

#	Item	Checklist item	Reported on page
1	Title	Identify the report as a systematic review, meta-analysis, or both.	Title page

Abstract

#	Item	Checklist item	Reported on page
2	Abstract	See the PRISMA 2020 for Abstracts checklist.	Abstract

Introduction

#	Item	Checklist item	Reported on page
3	Rationale	Describe the rationale for the review in the context of existing knowledge.	Introduction, paragraphs 1-3
4	Objectives	Provide an explicit statement of the objective(s) or question(s) the review addresses.	Introduction, paragraph 4

Methods

#	Item	Checklist item	Reported on page
5	Eligibility criteria	Specify the inclusion and exclusion criteria for the review and how studies were grouped for the syntheses.	Methods, "Eligibility Criteria"
6	Information sources	Specify all databases, registers, websites, organisations, reference lists and other sources searched or consulted to identify studies. Specify the date when each source was last searched or consulted.	Methods, "Search Strategy"; Supplementary S1
7	Search strategy	Present the full search strategies for all databases, registers and websites, including any filters and limits used.	Supplementary S1
8	Selection process	Specify the methods used to decide whether a study met the inclusion criteria of the review, including how many reviewers screened each record and each report retrieved, whether they worked independently, and if applicable, details of automation tools used in the process.	Methods, "Study Selection"
9	Data collection process	Specify the methods used to collect data from reports, including how many reviewers collected data from each report, whether they worked independently, any processes for obtaining or confirming data from study investigators, and if applicable, details of automation tools used in the process.	Methods, "Data Extraction"

#	Item	Checklist item	Reported on page
10a	Data items (outcomes)	List and define all outcomes for which data were sought. Specify whether all results that were compatible with each outcome domain in each study were sought, and if so, the methods used to decide which results to collect.	Methods, “Statistical Analysis”; Introduction, paragraph 4
10b	Data items (other)	List and define all other variables for which data were sought. Describe any assumptions made about any missing or unclear information.	Methods, “Data Extraction”
11	Study risk of bias assessment	Specify the methods used to assess risk of bias in the included studies, including details of the tool(s) used, how many reviewers assessed each study and whether they worked independently, and if applicable, details of automation tools used in the process.	Methods, “Risk of Bias Assessment”
12	Effect measures	Specify for each outcome the effect measure(s) (e.g., risk ratio, mean difference) used in the synthesis or presentation of results.	Methods, “Statistical Analysis”
13a	Synthesis methods (eligibility)	Describe the processes used to decide which studies were eligible for each synthesis.	Methods, “Statistical Analysis” (confounded studies excluded)
13b	Synthesis methods (data preparation)	Describe any methods required to prepare the data for presentation or synthesis, such as handling of missing summary statistics, or data conversions.	Methods, “Statistical Analysis” (Wan et al. conversion for median/IQR)
13c	Synthesis methods (tabulation)	Describe any methods used to tabulate or visually display results of individual studies and syntheses.	Results; Tables 1-2; Figures 2-5
13d	Synthesis methods (statistical)	Describe any methods used to synthesize results and provide a rationale for the choice(s). If meta-analysis was performed, describe the model(s), method(s) to identify the presence and extent of statistical heterogeneity, and software package(s) used.	Methods, “Statistical Analysis” (DerSimonian-Laird, I^2 , R meta/metafor packages)
13e	Synthesis methods (heterogeneity)	Describe any methods used to explore possible causes of heterogeneity among study results.	Methods, “Statistical Analysis” (subgroup, sensitivity, leave-one-out)
13f	Synthesis methods (sensitivity)	Describe any sensitivity analyses conducted to assess robustness of the synthesized results.	Methods, “Statistical Analysis”; Results, “Subgroup and Sensitivity Analyses”
14	Reporting bias assessment	Describe any methods used to assess risk of bias due to missing results in a synthesis (arising from reporting biases).	Methods, “Statistical Analysis” ($k < 10$, cannot assess)
15	Certainty assessment	Describe any methods used to assess certainty (or confidence) in the body of evidence for an outcome.	GRADE approach applied per outcome (risk of bias, inconsistency, indirectness, imprecision, publication bias); observational cohorts started at low certainty. See Methods and Table 3 (Summary of Findings).

Results

#	Item	Checklist item	Reported on page
16a	Study selection	Describe the results of the search and selection process, from the number of records identified in the search to the number of studies included in the review, ideally using a flow diagram.	Results, “Study Selection”; Figure 1
16b	Study selection (exclusions)	Cite studies that might appear to meet the inclusion criteria, but which were excluded, and explain why.	Supplementary S2
17	Study characteristics	Cite each included study and present its characteristics.	Results, “Study Characteristics”; Table 1
18	Risk of bias in studies	Present assessments of risk of bias for each included study.	Results, “Risk of Bias”; Table 2
19	Results of individual studies	For all outcomes, present, for each study: (a) summary statistics for each group and (b) an effect estimate and its precision.	Results (by outcome); Figures 2-5
20a	Results of syntheses	For each synthesis, briefly summarise the characteristics and risk of bias among contributing studies.	Results, each outcome subsection
20b	Results of syntheses (forest)	Present results of all statistical syntheses conducted. If meta-analysis was done, present for each the summary estimate and its precision and measures of statistical heterogeneity. If comparing groups, describe the direction of the effect.	Results; Forest plots (Figures 2-5); Summary table
20c	Results of syntheses (heterogeneity)	Present results of all investigations of possible causes of heterogeneity among study results.	Results, “Subgroup and Sensitivity Analyses”
20d	Results of syntheses (sensitivity)	Present results of all sensitivity analyses conducted to assess the robustness of the synthesized results.	Results, “Subgroup and Sensitivity Analyses”
21	Reporting biases	Present assessments of risk of bias due to missing results for each synthesis assessed.	Results (k<10; not assessable; stated in Discussion limitations)
22	Certainty of evidence	Present assessments of certainty (or confidence) in the body of evidence for each outcome assessed.	Table 3 (GRADE Summary of Findings) and Discussion. Certainty ranged from low (catheter failure) to very low (all other outcomes).

Discussion

#	Item	Checklist item	Reported on page
23	Discussion (general)	Provide a general interpretation of the results in the context of other evidence.	Discussion, paragraphs 1-4
24	Limitations	Discuss any limitations of the evidence included in the review and of the review methods.	Discussion, paragraph 6 (10 limitations listed)
25	Implications	Provide implications of results for practice, policy, and future research.	Discussion, “Clinical Implications”

Other information

#	Item	Checklist item	Reported on page
26	Registration and protocol	Provide registration information for the review, including register name and registration number, or state that the	Methods, first paragraph; Title page (PROSPERO CRD420261354170)

#	Item	Checklist item	Reported on page
		review was not registered. Indicate where the review protocol can be accessed, or state that a protocol was not prepared.	
27	Support	Describe sources of financial or non-financial support for the review, and the role of the funders or sponsors in the review.	End matter (Funding: None)
28	Competing interests	Declare any competing interests of review authors.	End matter (Conflicts of interest: None declared)
29	Availability of data, code, and other materials	Report which of the following are publicly available and where they can be found: template data collection forms; data extracted from included studies; data used for all analyses; analytic code; any other materials used in the review.	Data and R code available from corresponding author upon request
